NodoKare™

The New Standard in Biostimulants

NodoKare is a premium *Ascophyllum nodosum* biostimulant produced through a proprietary alkaline extraction process that preserves and concentrates key bioactive compounds.

The result is a pure, fully soluble, and highly consistent formulation with 3+ years of shelf stability—delivering stronger abiotic stress resilience, improved nutrient use efficiency, and higher quality yields season after season.

NodoKare provides consistent, reliable performance for peanut growers by delivering three critical advantages that directly impact your investment:

Powerful

It strengthens stress tolerance, improves nutrient uptake, and supports stronger root development—driving healthier growth and contributing to higher yield potential even under challenging conditions.

Versatile

It integrates seamlessly into any production program with broad tankmix compatibility, supports soil health and microbial activity, and offers a sustainable solution suitable for both conventional and organic systems.

Consistent

It delivers dependable performance thanks to its pure *Ascophyllum nodosum* extract and a proprietary alkaline process that ensures high bioactive content, full solubility, and a stable 3+ year shelf life without settling or clogging.

NodoKare is not just a biostimulant; it's the gold standard to support growers to a smarter, more productive ROI

Problem–Solution Fit

Problem Faced	Solution / Benefit	Why It matters
Poor early crop vigor	Boosts root development	Strong roots means better nutrient & water uptake, stimulates faster root initiation and development
Nutrient deficiencies	Improves nutrient availability, utilization & uptake through chelation and enhanced root growth	Improved nutrient use efficiency optimizes resources & boosts yield
Heat, drought, cold snaps, and salt stress	Enhanced abiotic stress tolerance by stomatal regulation and cell membrane stability during stress	Helps crops maintain normal growth during stress conditions, which can positively influence yield
Low peg set & poor quality	Promotes pod set and development	Increased marketable yield

Rates and Application Timings

3 OUNCES PER ACRE:

Soil applied treatment at planting

10 TO 16 OUNCES PER ACRE:

Apply at early bloom and repeat 14 days later

NodoKare mixes well with nutrients and other agricultural products.

Product details

Formulation: Soluble Potash (K₂O) 5.0%
Derived from seaweed extract (*Ascophyllum nodosum*) and potassium hydroxide.
